

# Git bisect

The image shows a terminal window titled "NSBrazil 2019" with a dark background. It displays the output of a series of Git commands. The commit history is listed at the top: aad41f4 (added number 4), f215b1c (added number 3), b4bef0c (added number 2), e5b4b29 (added number 1), and e5ad026 (initial commit). Below this, the command `git-demo git:(master) cat example.md` is executed, resulting in a list of numbers: 1, 2, 3, 3, 5, 6, 7, 8, 9, 10. The number 3 on the fourth line is circled in red. At the bottom, the command `git-demo git:(master) git bisect start` is followed by `git-demo git:(master) git bisect bad HEAD`, where "bad HEAD" is highlighted with a red box. Two red arrows originate from the "bad HEAD" box: one points to the circled "3" in the file output, and the other points to the text "Passo 2: Dizer pro git, qual commit é possível reproduzir o erro" on the right side of the image.

```
aad41f4 added number 4
f215b1c added number 3
b4bef0c added number 2
e5b4b29 added number 1
e5ad026 initial commit
➤ git-demo git:(master) cat example.md

5
6
7
8
9
10
➤ git-demo git:(master) git bisect start
➤ git-demo git:(master) git bisect bad HEAD
```

**Passo 2:**  
Dizer pro git, qual  
commit é possível  
reproduzir o erro

# Git bisect

```
NSBrazil 2019
b4bef0c added number 2
e5b4b29 added number 1
efad026 initial commit
➤ git-demo git:(master) cat example.md
1
2
3
3
5
6
7
8
9
10
➤ git-demo git:(master) git bisect start
➤ git-demo git:(master) git bisect bad HEAD
➤ git-demo git:(master) git bisect good e5b4b29
Bisecting: 4 revisions left to test after this (roughly 2 steps)
```

**Passo 3:**  
Dizer pro git,  
onde o erro não  
existe ainda.
