Git bisect

A partir daí, o git vai te mover na timeline de commits, buscando o commit assassino!

Git bisect

Testamos o commit (1) verificamos que o erro existe (2), marcamos esse passo como bad (3).

```
NSBrazil 2019
   git-demo git:(master) git bisect start
   git-demo git:(master) git bisect bad HEAD
→ git-demo git:(master) git bisect good e5b4b29
Bisecting: 4 revisions left to test after this (roughly 2 steps)
 [91486742273521fe85016488c7162e6deeb68521] added number 6
   git-demo git:(9148674) cat example.md
   git-demo git:(9148674) git bisect bad
Bisecting: 2 revisions left to test after this (roughly 1 step)
```
