SSL Proxying

Enabled

Include   0 >

Exclude   0 >

Add host names to the Include list to enable SSL Proxying for those hosts.

The Exclude list excludes host names matched by the Include list; such as if you've used a wildcard in Include and need to exclude specific hosts matched by that wildcard.

You may need to force-close and re-open an app in order for its requests to be visible after changing SSL Proxying settings.
