ppay-scan-demo.mov

```
# Compress video files while keep their quality
# Usage: compress video_file
# requires: ffmpeg
# tip: put this funcion on your ~/.profile file
compress() {
  sourcefile=$(basename "$1")
  filename="${sourcefile%.*}"
  ffmpeg -i ${sourcefile} -c:v libx264 -crf 24 -b:v 1M -c:a aac -strict -2 "${filename}"_compressed.mp4
}
```

Fazendo mágica no tamanho dos videos
